Art Unit 1711

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-8, 12-17, 19, 25, 27-30, 35-42 and 45-49 are rejected under 35 U.S.C. § 102(b) as being anticipated by Frandsen et al. (WO 91/18039), cited by applicants.

Frandsen et al. disclose a composition containing a "activating metal" (page 5 lines 5-10) which is mixed with ethylene vinyl alcohol and MXD6 (Example 1). Note that the MXD6 may be replaced by a polyamide resulting from "splitting" as in applicants' "oligomers" at page 2 lines 18-23. Containers may be produced from the composition at page 7 lines 10-12. Additional layers may be added at page 1 lines 34-35. As the MXD6 scavenges oxygen, it can be viewed as an antioxidant.

Claims 9-11, 20-24, 26 and 44 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
